

LiveDrawer

Presentation for Smiggle

February 2018

Presented by:

Dave Lunn
Group Director

A global leader in cash management

Tellermate is a leading provider of cash management solutions to the retail, grocery, food service and financial industries.

Our cash management solutions help businesses all over the world count and manage their cash quickly and accurately. Tellermate systems process over £1 billion daily in over 20 currencies and across 30 countries.

As cash volumes decrease the cost of cash transactions will inevitably increase. Our solutions and technology will allow companies to combat this threat and ensure efficient cash handling.

Introducing Smiggle to real-time cash counting

LiveDrawer builds Tellermate count-by-weight technology into the drawer itself, providing a wide range of powerful benefits.

- Reduce cash shrinkage
- Streamline processes
- Save time

LiveDrawer is a bespoke cash management solution that would be deployed into Smiggle's stores after a consultative and supportive process

The background of the slide is a black and white photograph of a retail store interior, likely a stationery or gift shop. The store is filled with shelves and displays of various products, including bags, boxes, and seasonal decorations. A large, dark, curved banner at the top left features the 'Smiggle' logo in a white, stylized font. A purple geometric shape, resembling a triangle, is overlaid on the right side of the image, containing text about retail theft. The overall scene is brightly lit, with products clearly visible on the shelves.

Smiggle®

Virtually eliminate cash loss in stores

By reconciling the cash within the drawer with what the POS expects in real-time, discrepancies are flagged instantly, removing the opportunity for internal theft. LiveDrawer has the power to virtually eliminate cash loss at the POS.

£37bn

The annual cost of internal theft to global retailers with the majority of this loss occurring at the POS
- Global Retail Theft Barometer, 2015

Complete cashier accountability

LiveDrawer provides a transaction-to-transaction audit trail for multiple operators who share the same till ensuring that the correct cashier can be associated with a cash discrepancy, event or incident.

A black and white photograph of a smiling female cashier with long, wavy hair, wearing a dark-colored dress. She is holding a stack of cash in her hands. The background is a blurred retail environment with shelves and a computer monitor. A purple geometric overlay is positioned in the lower right of the image, containing white text.

Every single transaction for a particular cashier is tracked allowing LiveDrawer manager to autonomously flag up any reconciliation errors in real-time and provide clear line-of-sight for management

Reduce labour hours

Real-time cash counting saves considerable time and reduces labour hours related to cash handling activities.

35mins

Pilots of LiveDrawer have averaged a labour time saving of 35 minutes per lane, per day

Real-time cash visibility in stores

By providing real-time cash inventories by denomination and transaction-to-transaction data, LiveDrawer keeps a running total of the actual cash in your drawer.

This real-time visibility of cash totals and events is revolutionary, giving you control over your in-store cash transactions like never before

A black and white photograph of a retail store interior. The background is a white brick wall with the word "Smiggle" in large, bold, black letters. A coiled black cord is hanging from the top of the letters. In the foreground, there is a dark counter with various items: a box labeled "USA SCRIBBLE", a cash register, a sign that says "SELECTED CHRISTMAS THEMED GOODIES BUY 1 GET 1 FREE", and several jars filled with small, colorful items. The image is partially covered by a purple diagonal overlay on the right side.

Smiggle

ROI across the entire organisation

LiveDrawer will have a powerful affect on multiple internal and external stakeholders.

Loss Prevention

Improve LP initiatives by placing the store manager on the floor (and providing real-time alerts)

Empower more and faster audits

Drive adherence to process

Harvest tribunal proof data

European pilots have demonstrated that LiveDrawer deployment virtually eliminates cash loss at the point of sale

Retail Operations

Reduce labour hours or redeploy staff to revenue generating tasks

Improve accuracy

Reduce operational costs

LiveDrawer will allow retailers to drive efficiency by automating manual cash handling. Staff will spend less time with cash activities and more time where it matters – with your customers

Other internal stakeholders

IT Systems

- Multiple connectivity options
- Little or no maintenance
- Software tools for easy integration to existing systems
- On-premises-based solutions available

Finance

- Reduce banking fees
- Decrease deposit discrepancies
- Increase cash visibility at both store and estate level

Your cashiers

LiveDrawer has been developed with the user in mind so the stress of handling cash is almost completely removed. With real-time alerts and supporting data to eliminate disputes, your cashiers will feel protected.

- Protects cashiers at the point of sale
- Real-time alerts straight to your phone
- Addresses notes tendered disputes

Your customers

By removing shift changeover delays, improving point-of-sale efficiency and ensuring that customers are no longer short-changed – it gives them another reason to return.

- Eliminates shift change-over delays
- No more running out of change
- Alerts when incorrect change is given

The real-time cash counting solution

Intelligent Cash Drawer

Integration

LiveDrawer will integrate seamlessly
with your existing EPOS system

Cashier Alerts

Cashiers will be instantly alerted if the
incorrect change has been given that
protects profits

Eliminate Errors

With overs/shorts instantly highlighted,
cash handling errors and cash loss at
the POS is virtually eliminated

Automated Counting

LiveDrawer never sleeps and never
loses count of the cash inside thanks to
real-time counting

LiveDrawer Manager

Real-Time Data

All cloud-based data is available and updated in real-time providing management with the insight to make instant decisions

In-depth Insight

The Intelligent Cash Drawer provides in-depth insight into in-store cash like never before

Clear Line-of-Sight

The software platform allows powerful analysis, reporting & insight into transaction-to-transaction data and in-depth cashier analysis

Close-Loop Solution

Connecting LiveDrawer, Tellermate Cash Counters and Drop boxes provides a complete end to end cash management solution

Mobile features

Discrepancy Alert

If a discrepancy occurs at any lane,
management can be made aware
immediately

Change Low Alert

LiveDrawer is aware of how much
cash is inside, pre-set thresholds can
be set to trigger alerts

Pick-up Alert

If LiveDrawer is almost full, immediate
alerts can be sent to management to
take action

We're Tellermate, People you can count on.

We are a team who think a bit differently about cash
management.

Tellermate process
